Washington, D.C. 20231

Sir:

Further to applicant's Duty of Disclosure pursuant to 37 C.F.R. § 1.56, applicant wishes to bring to the Examiner's attention the material cited on the enclosed PTO-1449 form.

German Patent No. DE 196 23 040 is a German translated patent. Accordingly, below is an English language translation of the abstract of the aforementioned German patent, which is believed to be it's relevance to the present application:

The choke has a pref. ferromagnetic core (1) of homogeneous structure or of segments of equal or different permeability and a coil (2) wholly or partly enclosing the core with constant or varying pitch and with or without intrinsic resonance damping. At least one further coil (3) is wound on the core and the starts of both windings are combined to form a common connection (4). The ends of the two coils are also connected directly to form a common connection (5).

Applicant: Schmidt et al.
Application No.: 09/868,391

It is respectfully requested that the Examiner consider this document and return an initialed copy of the PTO-1449 form indicating his consideration of the cited material.

Respectfully submitted,

Schmidt et al.

Volpe and Koenig, P.C.
